

Anurag Kumar Tiwari

Data Visualization & Analytics · Machine Learning · Full Stack Engineering

[GitHub](#) [LinkedIn](#) [LeetCode](#) [Portfolio](#)

anurag.tiwari2024@nst.rishihood.edu.in

SKILLS

DATA & ANALYTICS

Python SQL Scikit-Learn Tableau

Statistical Modelling ML Pipelines

Data Cleaning EDA

VISUALIZATION & REPORTING

Matplotlib Seaborn Excel Dashboards

Figma PDF Reports

ENGINEERING & TOOLS

React Flask FastAPI Node.js MongoDB

MySQL AWS EC2 Docker Tailwind

SOFT SKILLS

Product Thinking Research Communication

Leadership

EDUCATION

B.Tech — Data Science

Newton School of Technology, Rishihood University
2024 – 2028 **GPA 8.2 / 10**

Intermediate (Class XII)

Divine Public School
2022 – 2023 **80%**

Matriculation (Class X)

Divine Public School
2020 – 2021 **95%**

CERTIFICATIONS

- Certificate of Participation — **Google Developers Group**, Visual Vortex 1.0 Hackathon (UI/UX), Nov 2024

ACTIVITIES

- Director of Sponsorships & Partnerships — College Fest
- Product Manager & Maven — Dev Club
- Website Lead & Leadership — AIRIS (AI Club)
- Junior Radio Jockey — Loudspeaker 90 FM, Gorakhpur (6 months, 2019)

PROFILE

Data Science undergraduate with hands-on experience in **data analytics, ML pipelines, dashboard development, and end-to-end product engineering**. Built fraud detection models on 1M+ transactions, credit risk dashboards on loan portfolios, and scalable AI-driven platforms. Comfortable across the full data lifecycle — from raw EDA and statistical modelling to Tableau visualisation and product delivery.

EXPERIENCE

Product Intern · Bentham

Recent · Remote

- Led **end-to-end product development** — from ideation and requirement gathering through design, build, and delivery.
- Owned the full product lifecycle, collaborating across engineering, design, and stakeholder teams.

MERN Intern · Sahay AI Intelligence Technologies

Jun – Aug 2025 · Remote

React · Express.js · FastAPI · Python · AWS EC2 · Docker · CI/CD · Mavlink

- Led a team of **4 interns** to ship AI-driven products — control systems, AI platforms, and mobility solutions.
- Engineered Python/FastAPI backends handling **10,000+ concurrent users**; built responsive React frontends.
- Set up AWS CI/CD pipelines with Docker; implemented Mavlink-based drone telemetry features.

Volunteer — Web & Android Dev · SvaNiti NGO

Oct 2025 – Apr 2026 · Remote

- Managed web infrastructure and data-facing pages for a Public Policy NGO over 6 months.

PROJECTS

Transactions Fraud Detection

Python · Jupyter · Scikit-Learn · Tableau

End-to-end fraud detection on **1 million financial transactions**. Data engineering, EDA, statistical modelling & Tableau visualisation. Key findings: Card Not Present as top fraud type; fraudulent txns avg **\$730 vs \$174** for legitimate; ~40% fraud between midnight–5 am.

Credit Risk Dashboard

Excel · Data Analysis · Dashboard

Data-driven dashboard analysing a structured loan portfolio of **6,000+ loans**. Default rate monitoring, risk segmentation by FICO/DTI/interest rate, loan term risk comparison, and **data-backed underwriting recommendations**.

Bhoolekh — Property Price ML

Scikit-Learn · React · Flask

ML regression pipeline predicting Bengaluru property prices at **85% accuracy**. Full pipeline: raw data → feature engineering → model → Flask API → React visualisation UI.

Call Insight Generator

React · Express · MongoDB · Gemini AI · DeepGram

Audio analytics tool for customer support teams. Transcribes calls, generates **structured AI insights**, stores data in MongoDB, and exports analytics as **PDF reports**.
